

Tree Trimming Operations

Making way for clear and safe
passage for vehicles and pedestrians

Maintenance Operations

- **Street Sweeping**

12 feet high from paving

18 inches in from curb face

Trimming prevents:

Broken mirrors and
damages to other parts of
equipment

Trimming allows:

Better sweeping operations;
sweep closer to curb

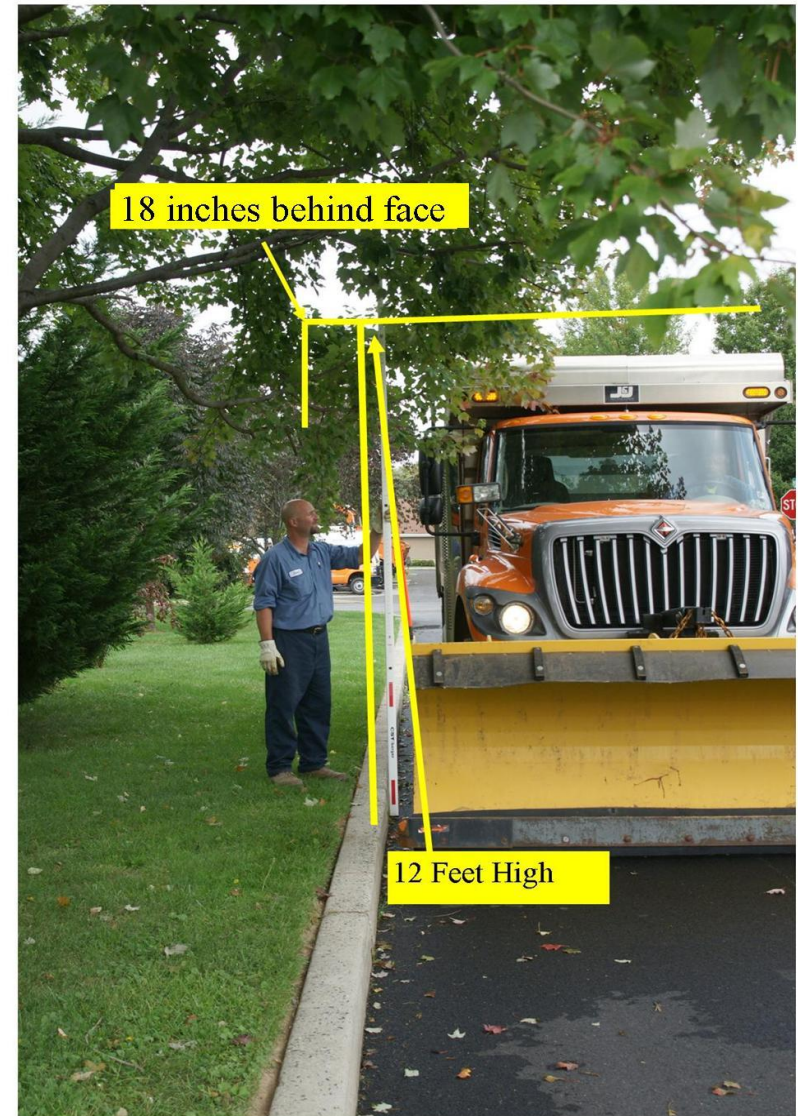

Snow Plowing Operations

Trimming 12 feet high from paving
Trim 18 inches in from face of curb

Trimming allows :

- Safer plowing
- Full width plowing
- Faster plowing
- No broken mirrors
- Less damage to equipment
- Less damage to trees

Paving Operations

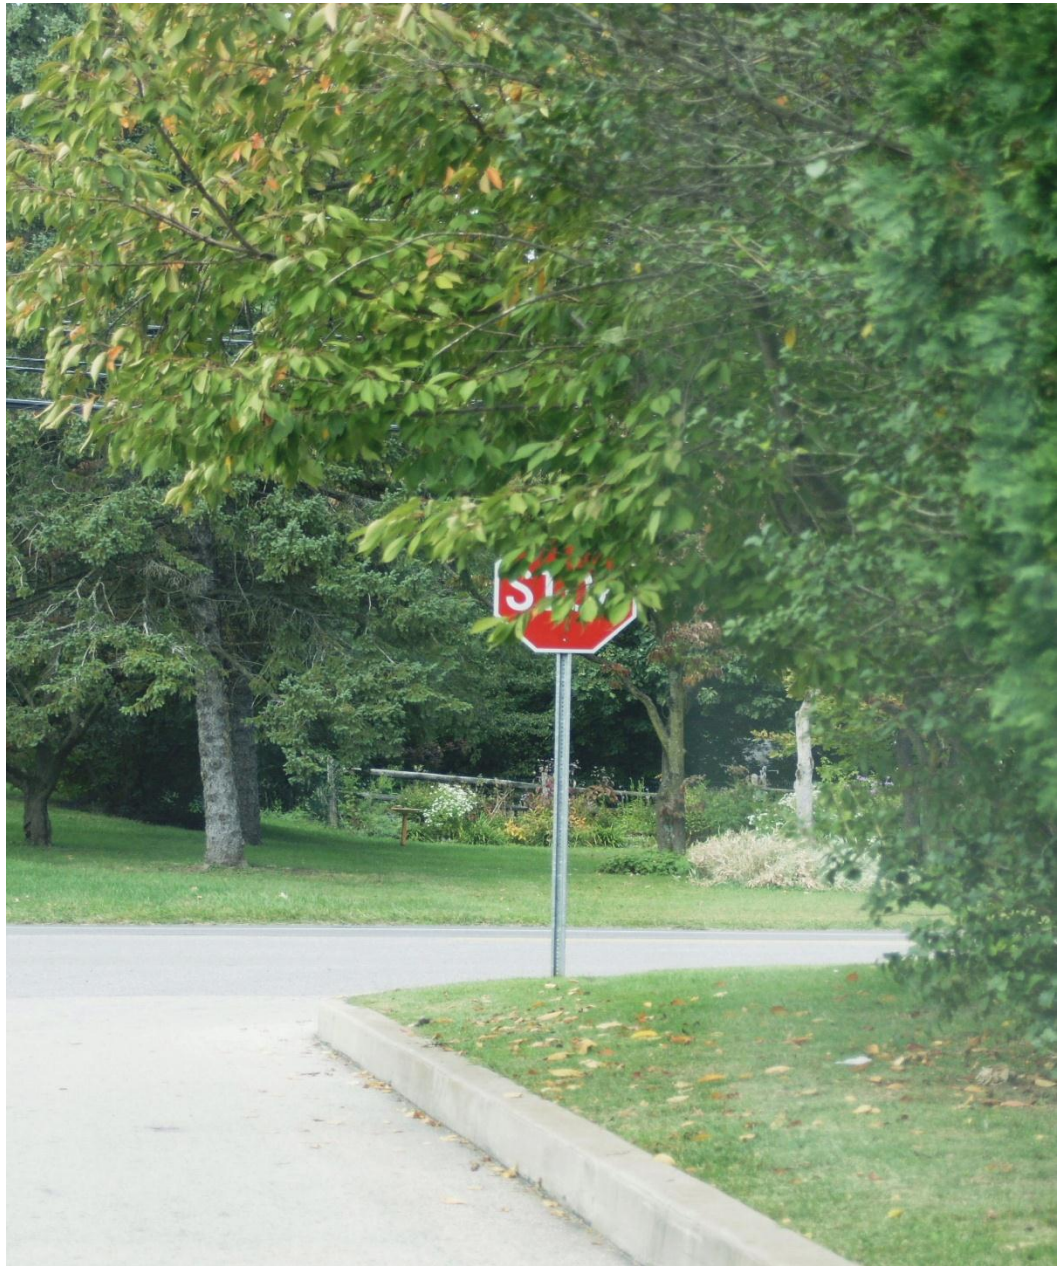

Paving Operations

Obstructed Signs

- Regulatory signs must be visible to be enforced
- Stop signs and speed limit signs

Obstructed Speed Limit Sign

Overhanging trees 9
feet up from paving

Obstructed speed limit sign

Sidewalk Obstructions

Date, _____

Property Owners

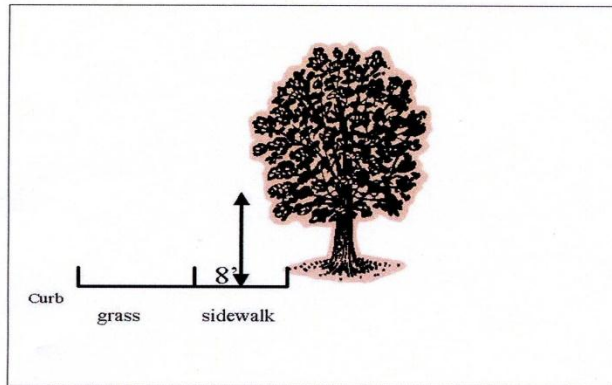

Blue Bell, PA 19422

Dear Property Owners:

We have received several calls from pedestrians in the _____ Subdivision regarding overhanging trees obstructing passage along the sidewalks in your development.

As with most developments, maturing trees have become a common problem. The Township requires at least an eight foot clear passage over the sidewalk within the Township right-of-way (see graphic). Most of the homes in the _____ Subdivision require some minor tree pruning to make safe pedestrian passage possible.

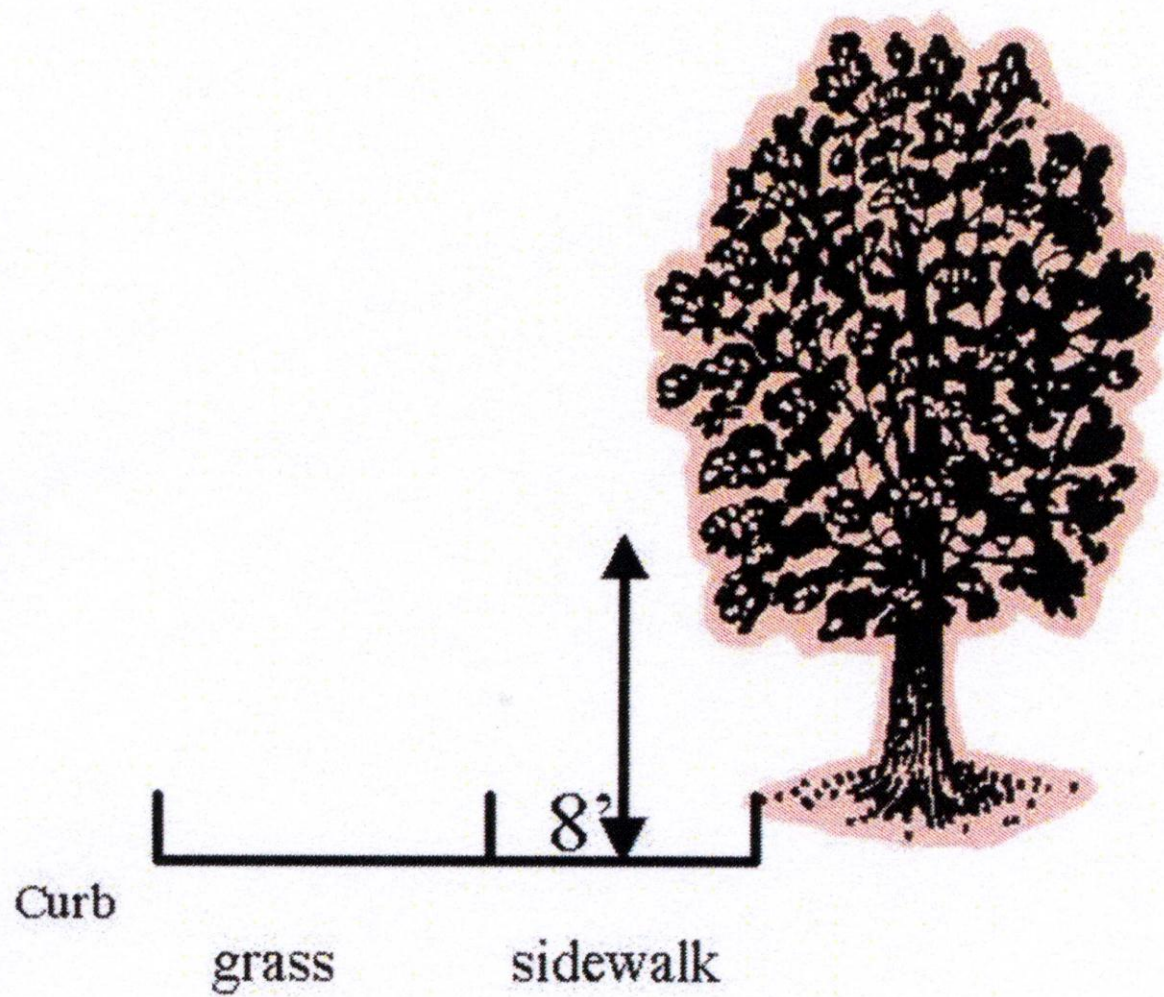

Thank you for your cooperation in complying with our Township ordinance and providing safe passage to pedestrians using the sidewalks.

Very truly yours,

Ronald J. Cione
Director of Public Works

/vmp

Thank you for
complying with these
regulations.
