D. Hydric soil boundary short procedure. A landowner may, upon signing an agreement with the Board of Supervisors, submit detailed soil profiles and a report to the Township’s consultant for the purposes of determining a hydric soil classification. If the Township's consultant and the landowner's consultant agree that the site-specific information supplied by the landowner indicates an accurate classification of the soils, then the Township shall accept this as the correct boundary. However, prior to any such change, the landowner shall be responsible for any map revisions and the costs thereof. In the event that the Township's consultant should not accept the information as being an accurate representation of a hydric soil classification, the landowner shall have the right to appeal to the Zoning Hearing Board as noted in Subsection B above.
