Water Quality Improvement Plan: The goal of the Plan (WQIP) is to identify, quantify and report on the existing water quality and habitat in the various water bodies throughout the Wissahickon Creek watershed and to promote policies, practices, capital work and retrofits to existing structures. The WQIP will prioritize these efforts to affect improvements in the habitat of the watershed in a timely and economical sequence.

Section 3 Guiding Principles.

a. The Parties have a mutual interest in restoring the impaired waters of the Wissahickon Creek Watershed and recognize that the issues associated with the TMDL developed by the EPA are too broad for any one municipality to effectively address, and therefore, the parties commit to collaboratively work together in a mutually cooperative and respectful manner to develop the WQIP to replace the EPA TMDL.

b. To evaluate historical and recent monitoring data to develop a scientifically defensible strategy that is acceptable to the Parties, PADEP, and USEPA, and which identifies specific areas within the watershed that have characteristics that may be contributing to the reduced water quality.

c. The WQIP will include a list of potential capital projects and to promote policies and practices to reduce the existing deleterious characteristics and contributing conditions, including remediating degraded physical structures and habitat conditions in the watershed, replacing or retrofitting existing structures, implementing new practices and constructing new facilities, to improve the impaired conditions in the Wissahickon Creek Watershed as effectively, efficiently and economically as possible.

d. The Parties agree that projects will be assessed and prioritized based on the anticipated ability to provide results that can be measured to monitor the progress of water quality improvements, and financial feasibility. The effectiveness of a project, or projects, would be evaluated and a determination made on the type(s) of subsequent work projects to pursue during the implementation phase, which is a separate phase from this plan development phase.

Section 4 Goals and Objectives: The scope of study

The goal of the Water Quality Improvement Plan is to improve water quality and habitat standards in the water bodies throughout the Wissahickon Creek watershed.
